Binary Bondi inflow: initial cavity and subsequent evolution
Accelerated residence times × 0.01; not a relaxed flow
Density ρ/ρ_∞ — reservoir
Density ρ/ρ_∞ — binary
Temperature $p/\rho c^2$ — binary
t = 0 M
1408 blocks
t = 330 M
736 blocks
x/M
y/M
Equatorial AMR slices in the rotating frame. Cyan: hole positions / nominal horizons; dashed circle: Bondi radius.
Grid lines show MeshBlocks. Cyclic-zoom regions have different evolution exposure; the final inner grid may be coarsened.
